DETAILED ACTION

Status of the Application

Claims 1-26 are pending in the application.

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 7, and 11-13, drawn to a bacterium belonging to the genus

 Escherichia expressing the polypeptide of SEQ ID NO:10 and having an ability to

 produce an amino acid, classified in class 435, subclass 252.33.
 - II. Claims 1-7 and 10-13, drawn to a bacterium belonging to the genus *Escherichia* expressing the polypeptide of SEQ ID NO:12 and having an ability to produce an amino acid, classified in class 435, subclass 252.33.
 - III. Claims 1, 3, 6-8, and 11-13, drawn to a bacterium belonging to the genus Escherichia expressing the polypeptide of SEQ ID NO:14 and having an ability to produce an amino acid, classified in class 435, subclass 252.33.
 - IV. Claims 1-3, 9, and 11-13, drawn to a bacterium belonging to the genus Escherichia expressing the polypeptide of SEQ ID NO:16 and having an ability to produce an amino acid, classified in class 435, subclass 252.33.

Application/Control Number: 09/459,573

Art Unit: 1652

V. Claims 14-16, 20, and 24-26, drawn to a method for producing an L-amino acid using a bacterium expressing the polypeptide of SEQ ID NO:10, classified in class 435, subclass 106.

- VI. Claims 14-20, and 23-26, drawn to a method for producing an L-amino acid using a bacterium expressing the polypeptide of SEQ ID NO:12, classified in class 435, subclass 106.
- VII. Claims 14, 16, 19, 20, 21, and 24-26, drawn to a method for producing an L-amino acid using a bacterium expressing the polypeptide of SEQ ID NO:14, classified in class 435, subclass 106.
- VIII. Claims 14-16, 22, and 24-26, drawn to a method for producing an L-amino acid using a bacterium expressing the polypeptide of SEQ ID NO:16, classified in class 435, subclass 106.
- 2. The inventions are distinct, each from the other because:

The inventions of Groups I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, represent structurally and functionally different polypeptides. Therefore, where structural identity is required, such as for antibody production, the different sequences have different effects.

The polypeptides of Groups I-IV and the method of Group V are related as products and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another

Page 4

Application/Control Number: 09/459,573

Art Unit: 1652

materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the bacterium of Groups I-IV can be used for protein expression or plasmid propagation and the L-amino acid produced by the method of Group V can be chemically synthesized.

3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification(s), restriction for examination purposes is proper. "For purposes of the initial requirement, a serious burden on the examiner may be *prima facie* shown if the examiner shows by appropriate explanation either separate classification, separate status in the art, or a different field of search as defined in MPEP 808.02" (see MPEP 803). The serious burden of search has been established by the different classification of the inventions, thereby requiring divergent patent and non-patent literature searches.

Claims 1-3, 6, 7, and 11-16, 19, 20, and 24-26 will be examined to the extent the claims read on the elected invention.

Application/Control Number: 09/459,573

Art Unit: 1652

Conclusion

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Steadman, whose telephone number is (703) 308-3934. The examiner can normally be reached Monday-Friday from 8:00 am to 4:30 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapura Achutamurthy, can be reached at (703) 308-3804. The FAX number for this Art Unit is (703) 308-4242. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Art Unit receptionist whose telephone number is (703) 308-0196.
